## MIL-C

The Nightforce Mil-C™ F1 reticle is designed for the long range precision shooter. The Mil-C™ F1 features a floating .05 MRAD center dot for precise aiming and limited target obscuring. The main horizontal stadia lines incorporate .2 MRAD hash marks giving shooters precise hold points for windage, and bold numbers provide easy-to-read reference points. The inverted “T” range estimation tool is offset from the reticle for a clear field of view.
